

Hans-Joachim Freund (born 1951) studied physics and chemistry at the University of Cologne and received his PhD in 1978 with a thesis on quantum chemical calculations and spectroscopic studies on transition metal carbonyl compounds in comparison with carbon monoxide adsorbates. Between 1979 and 1981 he worked in the Physics Department at the University of Pennsylvania as a postdoctoral fellow of the German Science Foundation on synchrotron studies of the electronic structure of adsorbates. After having returned to Cologne he finished his habilitation in 1983 and accepted in the same year a position as associate professor at the University Erlangen-Nürnberg. In 1987 he moved to a position as professor of physical chemistry at the Ruhr-Universität Bochum. In 1995 he accepted a position as scientific member and director at the Fritz-Haber-Institut der Max-Planck-Gesellschaft in Berlin where he is head of the Department of Chemical Physics. He serves as Adjunct Professor of the Ruhr-Universität in Bochum, and of the Freie Universität, Technische Universität, and Humboldt Universität in Berlin. In 1995 he received the Gottfried Wilhelm Leibniz Award of the German Science Foundation (DFG) and since 1996 he is a regular member of the Chemical Sciences Section of the Academia Europea as well as of the Berlin-Brandenburgische Akademie der Wissenschaften since 1998. He is Fellow of the American Physical Society since 2001. He is Centenary Lecturer of the Royal Society of Chemistry 2006/2007 and will be recipient of the Gabor A. Somorjai Award of the American Chemical Society in 2007. He is member of several scientific societies; member of several advisory boards of scientific journals, has published more than 500 scientific papers and given more than 520 invited talks. He is a founding member of the Scientific Council of the European Research Council.
